Google Workspace

AppDirect

Unlock Google's most comprehensive AI experience

with Gemini for Google Workspace

Google Workspace Business, Enterprise, and Frontline edition customers now have access to Gemini app with enterprise-grade data protections, allowing every employee to get started with generative AI. But with a Gemini for Google Workspace add-on, they can access the best of Google AI to boost productivity and creativity, improve decision-making, and deliver higher work quality than ever before.

Tap into the power of generative AI in the workplace.

Get more done in Google Workspace

- Gemini is built into Gmail, Docs, Sheets, and more so you can get help without switching apps.
- Gemini helps you find the information you need, leveraging your files, conversations, and calendar.
- Gemini can help you create or refine content based on your files in Drive, so you can leverage your existing work.

Go from insights to impact, faster

- Solve complex problems and provide insightful analysis with Google's most capable AI models.
- Upload and analyze files to generate answers, summaries, and insights in Gemini Advanced.
- Unpack information and surface meaningful insights about your data in Sheets.

Work smarter and connect better

- Let Gemini take notes for you so you can focus on the conversation.
- Communicate across languages in Chat and Meet.
- Streamline your workflows across your favorite Google apps and third-party applications.
- Tackle repetitive tasks or become an expert in new areas with Gems. Personalize them with custom instructions and knowledge to meet your needs.

Protect data with scale and precision

- Automatically identify, manage, and protect your data at scale with AI classification in Drive.
- Gemini for Google Workspace is the first enterprise-ready, certified AI assistant to meet these compliance standards: GDPR, CCPA, HIPAA. CSA STAR, ISO 27001/17/18, ISO 27701, ISO 9001, SOC 1/2/3.

Ready to unlock the full power of an AI assistant at work?
