

A NETRIX OFFERING

Virtual AI Architect

Who is this for?

- › This offering is designed for C-suite and executive leaders seeking strategic AI expertise without hiring full-time. It's ideal for organizations focused on digital transformation, data-driven growth, or aligning AI with business goals.

What do you get?

You gain a trusted advisor who:

- › Aligns AI strategy with business outcomes
- › Identifies high-ROI use cases across departments
- › Leads governance and risk assessment
- › Delivers executive-ready insights and reports
- › Enhances company-wide AI literacy
- › Provides ongoing strategic and technical guidance

Accelerate Transformation with Strategic AI Guidance

A unique Netrix offering designed to help organizations align AI initiatives with business goals through expert strategy and execution. The Virtual AI Architect works closely with leadership to identify high-impact opportunities and **translate business objectives into actionable AI use cases, such as implementing predictive analytics for sales forecasting or automation for operational efficiency.**

As both a technical advisor and strategic guide, they set realistic expectations, build AI literacy, and drive adoption across the business. From strategy and governance to implementation, the Virtual AI Architect turns AI vision into measurable results.

What to expect:

Get expert guidance across strategic planning and implementation. The Virtual AI Architect brings clarity and structure to your AI efforts through:

- › Technical reviews and guidance for AI implementations
- › Collaboration on model optimization and data requirements
- › Development of AI strategy and governance frameworks
- › Risk assessments and legal compliance coordination
- › Executive-ready reporting and ROI analysis
- › AI policy creation and updates based on emerging trends
- › Leading educational sessions and AI literacy programs
- › Facilitating governance committee meetings and audits

**Take the
Next Step
in Your
AI Journey**

Contact us today to learn how the Virtual AI Architect can help guide your organization through strategic AI adoption. Start implementing solutions that lead to measurable success.
